FLY TO PIECES

The Effect of Coffee on Highly Organized People.

"I have been a coffee-user for years, and about two years ago got into a very serious condition of dyspepsia and indigestion. It seems to me I would be a piece of cake. I was so nervous that the least noise I was distressed, and many times could not straighten myself up because of the pain.

"My physician told me I must not eat any heavy or strong food and ordered me to give my system a rest. I followed directions carefully, but kept on using coffee and did not get any better. Last winter my husband, who was away on business, had Postum Food Coffee served to him in the family where he was heard.

"He liked it so well that when he came home he brought some with him. We began using it, and I found it most excellent. While I drank my stomach no longer bothered me in the least, and I got over my nervous troubles. When the Postum was all gone we returned to coffee, then my stomach began to hurt me as before, and the nervous condition came on exactly what was the cause of the whole trouble, so I quit drinking coffee altogether, and kept on using Postum. The old troubles left again, and I have never had such a nervous attack since."
